

# 1. Endotracheal Tube

**\* It is a tube made of India Rubber chloride (PVC)**

**Polyvinyl**

**\*There is a 1 cm graduation along the tube to indicate the depth of insertion.**

**\*There is also a 2 cm mark ( called the Vocal Cord Guide) at the distal end which helps in placement of the tube beyond the vocal cords**

**\*The endotracheal tube may be cuffed or uncuffed**

**\*Endotracheal tubes may be for oral or nasal insertion**
